Quell is the most interesting puzzle game you've never heard of. It's beautiful and clever, and Steven Cravis's soundtracks are always fantastic. The series is four in and it has yet to have a weak link in its lineup.. Great game sad nobody plays it any more. Awesome game but you should add more weapons. Been seeing good updates on it, hoping for a 4 player co-op soon. Other than that, I'm in love with this game.. I actually bouht this table by accident (lol), but it wasnt a bad buy :). Great just what I wanted if you don't care for the extra tribes and you just want the story dlc in a bundle buy this thank you Monolith good price to.

Improves on Shadow of Mordor in every way possible, so yes you damn right I recommend it. The first time I bought Tropico I was looking for something different. Tired of the same old shoot-em-up stuff. Tropico had just come on the market and looked interesting. I was suprised at how much fun it was. i found it very addictive and ended up spending a lot of time in it. I tried Tropico Pirate's cove but couldn't get into it. I saw that Tropico 3 had gone back to more the way it was and I wanted to play it again so I bought it. I am not sorry I did. There are some things I don't care as much for but overall I think it is a great game. I would recomend this to anyone.. Pretty much the same as the base game except with reduced gravity and increased movement speed.

There is also no level lock on any of the weapons and you spawn in with like \$12,500.

there are some new maps and thats about it.

its okay I guess... I'd just like to say this is by far the best game I've ever played. It was immersive and captivating throughout my entire playthrough, and it combined the best elements of ARGs with a video game I don't even have to leave home for. I've never written a review for a game before, but this is one I'd highly recommend to anyone looking for a new game to play (especially those looking into games with darker themes). I just really can't express how much I enjoyed this game, and how much I look forward to sharing it with, well, just about everyone else I know. 12/10 game, definitely recommend.

~Jaye. The action RPG genre hasn't really changed. Soldak Entertainment makes an effort to make very unique ARPG's with more going on then just the same formula. All of these games are addictive and unique! Highly customizable with mod support and difficulty rulesets which can be toggled at the character selection screen! Multiplayer support, both online and LAN for Din's Curse and Drox Operative!

[They have a new game called "Zombasite" on the horizon. The hype is real!](#)

[Zombasite:](#)

<http://www.soldak.com/Zombasite/Overview.html>. [This is my review on this DLC](#)

[This DLC is amazing to start off. you have a lot of modifications, such as Motor swaps....Well you have to buy the car with the that has the engine in it. Which I think is BS. It's a Engine Swap, not a buy an whole different car.](#)

[Now the thing with "Lowered suspensions" is that you have to buy cars that are pre-lowered. Meaning you can't lower them. \(Which I was really hoping on. That way I could chose how low or how high the car sits.\) Another thing about the lowered cars is that some of the parts are clipping through the body of the car. I can see the rear shocks in the drivers seat. So Red Dot just lower the body. I was really also hoping on coil overs. The Green stanced car. That has the negative camber, is also a preset meaning you can't change it.](#)

[I did a quick full upgrade on the "Echos Cobra Drag" I got it up to 1800HP almost 1900HP, and I can't even drive it down the drag strip. It will just spin in every gear ECT 6th but after 2K RPMs that gear was gone, and yet again I was spinning my tires.](#)

---

Did I mention I was using Drag Tires? Because I was the whole time. I got zero traction and couldn't make a pass at all, which was very disappointing.

Do I think this was over hyped? Just a bit.

Over all, if you want to customize your car that little bit more that Red Dot has given us 3\$ is worth it. It's not over priced for what your getting. I would recommend this to any of my friends BUT tell them what they can and can't do.

"If" I had power on what to do about the suspension issue is that I would add an alignment test room. Where we can do anything that a alignment technician would.. The series costs too much even on sales.I am sure I'll wait for discount on the next tittle or just give up.. PopCap and Square-Enix have created a lush, lavishly written that is arguably the best of its kind. While the base mechanic feels somewhat restrictive, you are encouraged by the dramatic, sweeping soundtrack, gorgeous characters and sparse but delightfully period writing that distinguishes itself in a sea of match 3 games.

Regrettably the market is awash in cutesy, free-to-play match 3's that the price will at first appear bloated to casual players. This game has no in game currency or real world microtransactions, and there are no artificial barriers of difficulty. You either have the time and patience, or you don't. It's down to you and you're getting the full game for the lean price of its high quality content.

This is the most appealing match 3 game I've ever played. I encourage you to pick up this unsung gem and explore it thoroughly.. Needs a Network Southeast version, however the Plastic Pig is a fine emu. Also referred to by track workers as "Whispering Death" due to it's stealth like approach the sounds are pretty good too. Recomendded despite the limitations of the Gatwick Express livery.. I have almost played all games and I have to say this one is probably one of my least favorite. I did not like the character switches and overall it just seemed boring. Still would recommend if you love playing through the series!
