## NIGHTWALK Ativador Download [Ativador]

Download ->->-> <http://bit.ly/2SIpUJu>

### About This Game

Take a walk on a hidden Island and experience the longest summer night to ever happen. Sense the warm breeze filled with the whispers of familiar Trees, remember moments of an old friend and glimmers of a shared past.

Once again inhale the peaceful air of the forests and discover a manifold of beautiful phenomena.

Nightwalk is an atmospheric and relaxing first-person walking experience. Explore a huge Island shrouded in night, remember beautiful moments of your past life and find your inner peace while listening to piano ambient music, that will evoke feelings of nostalgia, mystery and friendship.

#### Developer Notes

Nightwalk was designed to be a relaxing but also very specific experience in its theme. The key focus was to give the player an open and freely explorable environment but to also experience the beauty of the night without any horror elements that usually come with them. The goal was to recreate past real-life experiences where we would stroll many times in the night, coming to ideas, thinking about the world and coming to realizations of our own.

#### Features:

- open designed Island and many places to visit

- 
- easy to play, no time or difficulty limits
  - discover some beautiful, natural but also surreal phenomena of the night
  - enjoy a long and calming piano soundtrack
  - only you are on the island and there is really nothing that will scare you

This game is still in an early development stage
